Abstract

The present invention relates to compounds represented by the formula ÄIÜ and salts thereof, wherein R<1> and R<5> each represents carboxyl, phosphonic or a derivative thereof; R<2> represents hydrogen, lower alkyl, (substituted) phenyl lower alkyl, lower alkoxy or (substituted) phenyl lower alkoxy; R<3> represents lower alkyl or (substituted) phenyl lower alkyl; and R<4> represents a group represented by the formula ÄXIÜ , ÄXIIÜ or ÄXIIIÜ . The compounds of the present invention have endopeptidase 24.11 inhibitory activity and are useful for treating cardiovascular diseases such as heart failure and hypertension, renal diseases such as renal failure, gastroenteric disorders such as diarrhea and hyperchlorhydria, endocrine and metabolic diseases such as obesity, and autoimmune diseases such as rheumatic disease, and for mitigating myosalgia, migraine, etc.
